1	Overview & Objective of Multi-Hazard Disaster Management Plan	1-3
2	Formulation of District Disaster Management Authority	4-11
3	Hazard, Risk and Vulnerability Analysis	12-18
4	Mitigation Plan	16-24
5	Resilience/Recovery Capacity Analysis	27-33
6	Role & Responsibilities of Department	34-40
7	Crisis Management Plan of Dept	48-78
8	Standard Operating Procedure (SOP's)	83-87
9	Annexure I, II, III, IV, V, VI, VII, VIII, IX, X, XI	88-134

## CHAPTER-3

# MULTI HAZARD DISASTER MANAGEMENT PLAN

### DISASTER MANAGEMENT

Disaster is a part of our world as we can either avoid it or it is possible to prevent several disaster situations. So the efforts can be reduced through systematic approach by Disaster Management activities. It can be an effective tool for saving vulnerable human lives and mitigation of human misery.

### INTRODUCTION- CONCEPT OF DISASTER MANAGEMENT

#### Disaster Management

The word disaster is coming from French word *desastre* meaning bad or evil and *disorder*. This is a very common usage of disaster and in our context, any disaster means a situation in which there is a sudden disruption of normally routine activity causing widespread damage to life and property.

#### Typology of Disaster

A disaster can either occur (EARTH, Flood, Cyclone, Storm, Landslide, Earthquake and Unconventional or human induced) (Fire, including Biological, Atomic, Airpollution, Radio Accident, Bomb, etc.) (Air) Industrial Accidents, Train, Earth Quakes, Nuclear Explosions and Ecological disaster). The disaster damage due to a combination of forces like improper development, food security, resources, health, cyclones, droughts, locusts, epidemics and earthquakes are some of the major natural disaster that frequently and increasingly affect our country.

#### Vulnerability

Vulnerability is defined as the extent to which a community, structure, service or geographic area is likely to be damaged or disrupted by the impact of particular hazard of that area, construction and practices in building/structure or a disaster-prone area.

#### Hazard

An event which causes a situation which can be dangerous to people or property if occurred in the populated area.

### KNOW CONCEPTS OF EMERGENCY MANAGEMENT

Emergency is not just appear and try, rather they are thought from and have life cycle of occurrence, and hence the management strategy should match the phases of an emergency in order to mitigate, prepare, respond, and recover from an event. There are four phases in emergency management: Mitigation, Preparedness, Response, and Recovery. These four phases are connected to having a certain relationship to each other (Fig 1 Emergency Management Cycle).

#### EMERGENCY MANAGEMENT CYCLE:

**Mitigation** refers to activities which actually diminish or reduce the vulnerability or chance of occurrence or the effects of a disaster. Mitigation phase begins with conducting hazard identification and vulnerability analysis which are essential to the planning of all other phases. Hazard identification and vulnerability analysis is two stage process. First the hazard is identified which has the potential of affecting the population. Secondly, how people, property and resources will be affected by the hazardous event.

**Preparedness** is a state of being ready to react promptly effectively in the event of an emergency. Being prepared means that a plan of action exists for an emergency or that it is clear to what to do before the emergency occurs. Preparedness measures to be undertaken depending upon the analysis.

of human security and vulnerability, which is also the basis for devising mitigation strategy. In some areas, such as flood, typhoons, or early warning systems, there is an alternative, albeit at great expense, of an engineering approach such as with embankments, concrete, caissons, and so on. But it is essential to identify the resources available, and ways to utilize them.

### Response Phase

The first five steps of response to any emergency or disaster are:

1. Warning
2. Immediate Public Safety
3. Property Security
4. Public Evacuation
5. Evacuation

### Recovery Phase:

The final phase of disaster management is recovery, both short-term and long-term efforts. Short-term recovery is the restoration of vital services and facilities to maintain standards of operation and safety. Long-term recovery efforts may continue many years to the extent directly related to the pre-disaster conditions.

Disaster Management Cycle (Fig 2)

### DISASTER AND ITS CHALLENGES

Along with typhoons, floods, earthquakes pose a possible threat, particularly due to the fact that in time, location and magnitude can't be accurately predicted. Moreover, entire Southeast region of India is situated in a seismicity active zone (zone V). The region has been subjected to several violent earthquakes in the past. Challenges created by disaster particularly in the natural disaster such as flood, typhoons and high intensity earth quakes are -

- To rescue and evacuate trapped people.
- To provide food and to the affected people.
- To take care of children, women and disabled people.
- To provide shelter and temporary housing for the displaced and homeless people.
- To ensure communication systems are functional at times.
- To provide medical, nursing, dental and pharmaceutical services.
- To provide studies and scientific literature people.
- To arrange for loans and monetary value to the affected people.
- To take immediate measures for disposal of dead bodies and animal carcasses to prevent the outbreak of epidemics.
- To take urgent measures for maintaining law and order.
- To take people to safer places or areas of change of course of river due to flood.

### FORMULATION AND PREPARATION OF THE PLAN

The District Disaster Management Authority (DDMA) which is the statutory body, prepares the plan with support from all relevant line departments, members of PUI, Community Based Organisation, and NGOs etc. The District Disaster Management Plan includes the following

and figures that have been collected from various offices and informal sources with a view to meeting the challenges facing our District District. The plan has been prepared with the following objectives:

1. Contingency Plan is a continuous process.
2. All are not equal in terms of resources, giving emphasis on special vulnerable groups i.e. elderly, economically weaker, and not doing preparation and learning another, old people etc.
3. The top level measures should include various contingencies.
4. Involvement of various and PHA in the entire process.
5. Mitigation Plan reflecting over time opportunities from the grassroots level.
6. Well defined responsibilities and Response Plan for the entire district.

#### OBJECTIVES

The objectives behind the preparation of the District Disaster Management Plan is

- To mitigate impact of natural and man-made disasters through preparedness at District, Block, Gram Panchayat and Village level.
- To provide effective support and resources to all the concerned individuals, groups and departments in disaster.
- To meet the law requirements, build education, communities in developing protective skills for disaster preparedness and management.
- To disseminate formal or informal to a timely, accurate and timely manner while maintaining necessary confidentiality.
- To develop immediate and long-term support plans for vulnerable people in disaster situations.
- To create awareness among the people about disaster circumstances and increasing their participation in preparedness, prevention, development, relief, rehabilitation and reconstruction process.
- To have response system in place to face any emergency.
- To affect or avert the least possible disruption to the normal life process when dealing with natural disasters.
- To ensure active participation by the grassroots organisations, committees, NGOs, CBOs and voluntary or all levels making optimal utilization of human and material resources.

#### PERFORMANCE

A broad plan for managing disaster would include

- Preparing a proper response or response action.
- Allocation of responsibilities to the participating agencies.
- Developing policies and procedures for disaster management and implementation.
- Awareness of existing facilities and resources.
- Mechanism for effective management of resources.
- Continuation of all relief activities including those of NGOs to ensure a coordinated response.
- Coordinating with the state response machinery for appropriate support.
- Testing the plan including mock drills.
- Defining limits of acceptable risk.
- Monitoring and evaluation of various issues during relief and rehabilitation.

#### ROLE OF THE DISTRICT ADMINISTRATION

In anticipation of any disaster, the District Administration has taken various precautionary measures. Functioning of the Control Room, Groups of post branches is over

and animal husbandry and gathering of forest products, and rearing and extension of forest department, communication of forest produce, functioning of forest revenue areas, improvement of forest country roads, localisation of temporary VTF control, arrangement for keeping telephone and telegraph lines in order, strength of forest staff, arrangement for keeping forests clear, agricultural health veterinary measures, selection of forest/ryotia shikari, etc. have been recently discussed. The programme officials of different departments have been apprised of their duties for the year during and post disaster periods. The Civil Officer, S.D.O., U.P., Executive Engineer of Irrigation Department, Health Officer, A. & Veterinary and J.C.E. etc. have been requested to take all precautionary and protective measures and to remain alert to face the challenge of any disaster.

#### OVERVIEW OF THE DISTRICT:

##### **Land and People**

Baramulla district is spread over an area of 2378 Sq. Kms. on north bank of Brahmaputra River.

##### **Boundaries:**

**North:** The town of Anantnag District.

**South:** Mirzanpur, Nagarn, Jambh and Gulabgar districts.

**East:** Thiruvananthapuram.

**West:** Durgam District. (Radhakrishna River serves as the boundary)

The District lies between 34°30'N and 37°01'N latitude and between 92°15'E and 95°02'E longitude.

##### **Climate:**

Annual climate varies as Durgam District in 1911 and Srinagar in Durgam district in Baramulla District in 1911 and again referred to Durgam and Mirzanpur District in 1914.

##### **Majority of the District: Physiography:**

Located between mighty Brahmaputra River and Karakoram foothills of Anantnag District, the district is largely plain with some hills.

##### **Rivers:**

Brahmaputra River forms the south boundary of the district. A number of rivers which originate in the Himalayas in India flow northwards and ultimately fall in Brahmaputra River.

**Pechni, Sankar, Chithari** form its river tributary.

**Bara-Rupa, Sirohi, Jambh** is administrative.

##### **Upper District and Bar District: Climate:**

The maximum of the winter is 1911/12 M.C. The minimum occurs from May to October and varied up to low part of October.

**Population Data:** According to the 1911 Census (including Thiruvananthapuram), the Baramulla

## CHAPTER-III

### HAZARD, RISK AND VULNERABILITY ANALYSIS

#### Cases of Major Diseases/Infectious Diseases in the District

Typhoid Fever	Shamir Indialal Disease
Succoral Fever	Chikungunya Virus
Malaria	Acute Hemorrhagic Conjunctivitis
Systemic Malaria, Malaria Recrudescence etc.	Flu-Shingles Fever
Leishmaniasis	Scrub Typhus
Dysentery	Scrub typhus by Pulicoid, Scud Group Dysentery (Shigellosis)
Tuberculosis (Tubercle)	Yersinia Antrax
Amoebic Dysentery	Cholera Vibrios

The area of Anantnag is a whole can be categorized as a flood prone area and Anantnag district is situated in the northern plain agro-climatic zone of the state. The river Srinagar flows along the entire northern border of district with its numerous arms - crossing through the district in the north to south direction. The district experiences a hot and humid climate with moderate to heavy rainfall. The northern part of the district receives comparatively higher rainfall due to its location near the Himalayas foothills.

The major disease related problem of Anantnag district is flood which has been recurring periodically since last several decades. Districts are usually affected by several diseases like food, water and vector of which the flood and vector are water-borne/disease causing great loss of standing crops, damage to public property like roads, schools, houses etc. Along with flood, water is a disease carrier due to which Anantnag district is usually being ravaged of one or more outbreaks.

In Anantnag district in general in District Zone V, there is a high probability of occurrence of outbreaks. But the other several diseases that are likely to take place are water and the

#### Details of outbreaks:

Sl. No.	Name of outbreak
1	Chikungunya 4000 from Tarni to Gollan creek
2	Sh. Shari 8-1000 MT Road to water
3	Dysentery 20000 (vector to water)
4	Chikungunya 100000 from Kalaran to Doharwal
5	Chikungunya 100000 from Gollan to Gollan
6	Chikungunya 100000 from Gollan to Gollan

#### Details of Gauge Level of Water of River:

Sl. No.	Name of river	Gauge site	Gauge level (in meter)
1	Srinagar	At Srinagar, Tarni	61.27
2	De River	At De River	72.23
3	Devi	At Srinagar	61.27
4	Devi	At Srinagar	69.25
5	Devi	At Srinagar	67.41

### FLOOD HAZARD MAP OF SOUTHER DISTRICT:

### HAZARD PROBABILITY & VULNERABILITY ANALYSIS

#	Type of Disaster	Time of Occurrence	Exposed Region	Typical Action
1	Flood	High water	Low of hazard (L), to reach crop loss & infrastructure	Evacuation
2	Debrisflow	Season	Low of hazard (L), to reach infrastructure losses, disruption of communication network	Evacuation
3	Cracks/Slump	Months/Year	Low of hazard (L), damage to infrastructure losses, disruption of communication network	Evacuation
4	Slip	High water	Damage to crop, blocking roads	Evacuation
5	Fire hazard	anytime	Low of hazard (L), from infrastructure, population	Evacuation
6	Rock Fall/Slump	High water	Low of hazard (L), crop, infrastructure, disruption of road communication	Evacuation, to reach, Sign, Road, Address, etc. etc.
7	Gas Leakage	Season	Low of hazard (L) region	Evacuation

## **HEAVILY IMPACTED WILDERNESS CEASARS IN SCOTTISH DISTRICT: COMMUNAL ETHNIC PROBLEMS**

Recent incidents in Jersey as well as in other parts of the country indicate persistence of communal or communal bias. Several incidents of communal violence in Delhi, Karnataka and other places have strengthened communal stereotypes in the country.

**Delhi, He shows, emergency situation may arise in the districts for the following reasons :-**

- Another school teacher and other professionals within community, have reporting larger building collapsed during recent disaster.
- All Jersey Tax Tribes Association may initiate an aggressive agitation over the issue of wages, electricity, supply of water and drinking water, payment of CDF etc. in the District Offices of Assam Tea Corporation. They may protest the political leaders in attending the Tea Workers and holding meetings etc.
- Youth and students organizations may raise issue of 'independence and separation of provinces', (b) To declare floods as a National Problem, (c) Issue of lower tax payment, (d) Local Employment, (e) Welfare services in the rural frontiers, (f) Corruption issues and other agricultural programmes.
- Six organizations, taking the rural areas may launch agitation for declaration of ST status in their respective communities.
- Issues like issues like construction of roads, bridges, water supply and other welfare schemes may also lead to agitation in food level.
- Group clashes between the political parties and irregularly occur as common in rural and
- While working UTPs and other tall chimneys in Tropic Court and Kanching Club Hospital, Tropic Court Central Jail, Tropic.

## **THREATS TO AIRCRAFT SAFETY:-**

In view of current security scenario, various kinds of hijacking attempt is being and for that incidents occur in the air. A security scenario plan shall be followed to prevent and suppress various kinds of the Civil Air Transport, Airlines, Tropic. The following security threats and have and other challenges should be considered in detail, prevent and resolve operations.

- Car vehicles have become increasing common. They are also being used for hijacking of the flying crew.
- Terrorist activities demand flying crew and the air crew.
- Terrorist group makes other than vehicle engaging in the same activities.
- Attack against road ambulances.
- Act of sabotage including car bombs in parking area.
- Entry through personnel areas and the aircraft hijacked by situation or accident in parking grounds or off-road ambulances.
- Attack from airways area beyond airport perimeter or. Many attacks have of road and transport system overall. Airlines from various airports/airports particularly from local area.
- Limited security of road and airport check and as a challenge for transportation.

## **GENETIC AND BIOLOGICAL RESEARCH**

It is an advancement by identification and research in the DNA of various biological organisms for the regional plant and animal diversity and ecological stability. Genetic and biological research. The genetic and biological research and ecological research are widely available for biological research papers. These papers on DNA research and genetic research in rural areas. These developments make use of genetic and biological research research to research and a progress present the results of the present genetic.

## CHAPTER-IV

### MITIGATION PLAN

The disaster planning consists of activities such as disaster mitigation and disaster preparedness. Disaster mitigation focuses on the hazard that causes the disaster and tries to eliminate or minimize its effects. The best example of mitigation is the construction of embankments and construction of proper drainage system in flood prone areas to avoid flood.

The other example includes retrofitting of weak buildings to make them earthquake resistant. Preparedness focuses on plans to respond to a disaster that is imminent. It takes into account an evaluation of emergency needs and identifies the resources to meet the needs. The first objective of the preparedness is to reduce the disaster impact through appropriate actions and improve the capacity of those who are likely to be affected most. The second is to ensure that ongoing development continues to improve the capacities and capabilities of the system to strengthen preparedness efforts at community level. Finally it provides recommendations on risk source reduction to vulnerability. The best example of preparedness activities are the development of community awareness and assessment system through community education and communication programmes by way of developing of supplies, developing emergency plans for rescue and relief.

#### DISASTER MITIGATION MEASURES

The responsibility of tracking of asset awareness and safety measures to be taken in the event of occurrence of occurrence of an earthquake and approval of DMS and DMS to in such a situation is entrusted to the following teams by their respective teams.

S. No	Members of teams	Area to be covered
1	All CDAC members of District	Districtal Bar Circle
2	All CDAC members of Jammu	Jammu Bar Circle
3	All CDAC members of Dera Dun	Dera Dun Bar Circle
4	All CDAC members of Jhelum	Jhelum Bar Circle
5	All CDAC members of Sialkot	Sialkot Bar Circle

The CBU, till the period budget Dept. is entrusted to the responsibility of issuing suitable instructions to all ZDOs to convene at least one public meeting in each GP of ward Block for creation of awareness over the matter of assistance to be taken to resolve safe from devastation and destruction caused by Earthquake.

In Municipal Ward Town Committee area such meetings shall be convened by the Chairpersons of the concerned Municipal Ward Town Committee. The Deputy Controller of Civil Defense, Tigris shall deploy officials/trained volunteers for demonstration of safety measures with in Schools, Colleges, Public Place such as Shopping Mall, Cinema Hall etc.

The Circle Officers shall ensure holding of at least one public meeting in each GP under their respective circle and submit reports in this regard to the District Commissioner, District, Tigris.

#### MOBILIZATION OF VOLUNTEERS FOR RELIEF & RESCUE OPERATIONS

The responsibility of mobilization of volunteers for constitution of the Quick Response Teams for rescue and relief and training also demonstration of earthquake situation is entrusted to the Circle Officers of the Revenue Circle of the district.

The Circle Officers along with other local Dept. officers, shall mobilize other units of Emergency Operation and Approval of Safety, likewise shall mobilize the volunteers for rescue and relief and training also demonstration of earthquake situation in their respective circles. One team of volunteers should be made ready in each GP monthly constituency area in the next next to urban area one team of volunteers should be there in each ward of the Municipal Ward Town Committee. Assistance of the NGOs/Civil PSC representatives and Ward Committees of Municipal Ward Town Committee, Staff of Educational Institutions should be taken to constitute QRT of volunteers.

Members of VFD should not be involved in QRT. All QRT should be used to attend the public meetings to be organized for creation of awareness and approval of relief measures and working of after earthquake situation. Each QRT should be present one person for rescue, relief and holding after earthquake situation in the face of occurrence of disaster of earthquake. The Circle Officers shall submit reports in this regard to the District Commissioner, Bhopal, Tazara.

#### **IDENTIFICATION OF HAZARDOUS STRUCTURES:**

The Executive Engineer, FPD (Building), Tazara is given the responsibility of identification and inspection of weak structures in the district and to submit report in this effect to the District Commissioner, Bhopal, Tazara immediately. In the matter of identification and inspection of weak structures in Municipal Road Town Committee areas, the Executive Engineer, FPD (Building), Tazara shall be assisted by the Chairpersons of concerned Chairpersons of the Municipal Road Town Committee. In rural areas, the technical staff of the office of the concerned NDC shall assist the Executive Engineer, FPD (Building), Tazara in identification and inspection of weak structures.

All buildings of the educational institutions should be covered for their safety inspection. The Executive Engineer, FPD (Building), Tazara shall also arrange to conduct ETV of all Govt buildings in the district. The Executive Engineer of FPD Technical Road Division, Tazara/Chhatrapati Sangapur - Lohar shall identify the narrow roads which require widening of the road surface and shall take steps to broaden such roads.

#### **RULE OF POLICE:**

The Superintendent of Police, Bhopal, Tazara is entrusted with the responsibility of maintenance of Law and Order in the face of occurrence of disaster. The Superintendent of Police, Bhopal, Tazara shall also report for checking the nature, strength and activities of the anti social elements who may take the advantage of the situation after occurrence of disaster and indulge in lawlessness. All Officers-in-Charge of the Police Station of the district shall be strictly monitored by the Superintendent of Police, Bhopal, Tazara to observe concerned Circle Officer in rescue, relief and holding the after earthquake situation. All members of VDA, regional units and Police Station, should be present one person for rescue, relief and holding the after earthquake situation. All Officers in Charge of the Police Station Police Out posts shall coordinate with local Fire Service authorities to press fire watches and services for rescue operations. The Superintendent of Police, Bhopal, Tazara shall coordinate with District Home Guard Commissioner in the matter of pressing Home Guard personnel for rescue, relief and holding the after earthquake situation.

#### **RULE OF CIVIL DEFENCE:**

The Deputy Commander of Civil Defence, Tazara is entrusted with the responsibility of assisting the district administration in the matter of organizing training for rescue and relief operations in the face of occurrence of disaster.

The responsibility of passing the trained volunteers of Civil Defence Organization into relief teams, relief operations and in holding post-disaster/after earthquake situation is also vested in the Deputy Commander of Civil Defence, Tazara.

In fulfil of the entrusted responsibility the activities of Civil Defence Organization, Tazara are taken the following steps:

Civil Defence volunteers have undergone training in different Civil Defence Courses. Civil Defence volunteers have undergone advanced training in CTE, Pankaj, Jwarhar.

The recruitment of Civil Defence personnel and procurement of equipment vehicles etc. is the responsibility of various Civil Defence Services on the basis of budget and scale sanctioned to MPOD (Area Office).

#### ROLE OF DISTRICT HEADQUARTERS:

In order to assist the District Administration in various relief and in handling other emergency situations, the office of the District Head Quarter Commission has created Quick Response Teams (QRT) under the overall command of the District Head Quarter Commission, Durgam.

#### ROLE OF ARMY CORPS:

The Army authorities of HQ + Corps, 11 Mountain Brigade of Army shall be formally requested by the District Administration for assisting in various relief and handling other emergency situations in the district in the face of occurrence of any disastrous earthquake.

Sanitary services of SSB/CAF and other CAF units in the district shall be requested by the District Administration for assisting in various relief and handling other emergency situations in the district in the face of occurrence of any disastrous earthquake.

The Engineering wings of the Army and CAF shall be pressed into service for rescue of the people trapped in various or collapsed structures. The Medical Wings of the Army/CAF shall assist the district health authorities in providing medical relief to the affected people. The help of the Signal Communication wings of Army/CAF shall be taken for maintaining communication between affected places and district administration in the face of occurrence of any disaster. The Army/CAF shall give moral support Administration in all other aspects of management of various relief and handling other emergency situations in the district.

#### ROLE OF FIRE SERVICE:

All Fire Service Stations in the district shall constitute Quick Relief Teams for emergencies. The Fire Services in case Fire Service Stations should be kept ready round the clock.

In the event of need the QRTs of Fire Service Stations shall be pressed into service for rescue of the trapped people.

#### ROLE OF DISTRICT MEDICAL AND HEALTH AUTHORITIES:

The Joint Director of Health Services, Anaparthi is vested with the responsibility of arranging emergency medical services to the people affected in disaster.

All Ambulances (Health Dept owned and private) including Motorcycles, MB shall have to be pressed into service for transportation of injured persons.

Topper Medical College & Hospital in Hanamant City Hospital, Tappan, shall be notified as base hospital.

All hospitals of Army, CMH, PHCs, State Dispensaries, Main PHC and Veterinary Health Centres will be made ready first and priority. The services of private hospitals, Nursing Homes shall also be utilized to meet the emergency.

Medical aid to the earthquake survivors affected people shall be arranged as per below: (i) District and Sub-District level and (ii) PHC/panchayat level. In District and Sub-District level the Joint Districts of Health Services, Veterinary and other respective ICMJ & SC shall issue the orders and plans another ready to be used as different PHC in the event of need in a short notice of time.

The Joint Districts of Health Services, Veterinary shall keep sufficient stock of medicines and first aid accessories ready for dispatch in a short notice of time.

In PHC level, sufficient stock of medicines and first aid accessories should be kept readily available. The First Aid Teams should be constituted in each PHC. In each First Aid Team there should be at least one Doctor, one Paramedic, one Dressed, two ANM's and two Health Worker staff.

In the event of occurrence of disaster, the First Aid Team should relay back to the PHC and the other teams should rush to the affected places. Arrangement should be made to perform First Aid services immediately in PHCs and Main PHCs. The Director of all PHCs, Sub PHCs, should immediately liaise in touch with concerned local Circle Officer and Officer-in-Charge of Police Station for any issue of assistance and requisition of supplies of medical relief items.

#### COORDINATING THE EMERGENCY, DISTRESS AND DISASTER RELIEF ASSISTANCE

- All Circle Officers along with Field Officers (FO) shall identify open spaces and buildings for setting camps for providing shelter to the affected people.
- The CEO, the concerned Division shall coordinate with Block Development Officer (BDO) to request to assist the Circle Officers to construct sheds for sheltering the affected people.
- The Chairpersons of the Municipal Societies/Town Committees shall also assist the Circle Officers to construct sheds for sheltering the affected people.
- The Block Development Officer and Chairpersons of the Municipal Societies/Town Committees shall also assist for bringing NTN's and other sources of drinking water to the camps.

#### ARRANGEMENT OF DRINKING WATER PUBLIC HEALTH ENGINEERING DEPARTMENT

- The Executive Engineers of PHE, Tezpur Division (EE) are entrusted to the responsibility of arranging safe drinking water for the masses of the relief camps/shelters.
- The PHE authorities shall keep stock of essential and industrial repairs ready for immediate repairing of damage of any of its water supply schemes in a short notice of emergency.
- The Executive Engineers of PHE, Tezpur Division (EE) shall keep stock of sufficient no. of NTN's, so that there can be found immediately in relief camps.
- The PHE authorities shall also keep stock water disinfecting chemicals for purifying water of the existing sources.
- The complete responsibility in the matter of supply of safe drinking water to the affected people is entrusted to the Executive Engineers of PHE, Tezpur Division (EE).

#### DUTIES ASSIGNED TO FOOD & CIVIL SUPPLY AND CONSUMER AFFAIRS DEPTT.

- The Deputy Director of Food & Civil Supply & Consumer Affairs Deptt, Tezpur is entrusted to the responsibility of keeping sufficient stock of food grains and other essentials that might be required to be provided to the masses of relief camps. The Deputy Director of Food & Civil Supply & Consumer Affairs Deptt, Tezpur shall

regularly monitor the work progress of field crews in PWD programs and provide feedback.

- On receipt of requests from the North Queensland, Sydney, The Deputy Director of Road & Civil Supply & Contract Affairs Dept. Tugger shall arrange to provide the field crews and other field resources for transport to the affected areas.
- The Deputy Director of Road & Civil Supply & Contract Affairs Dept. Tugger shall also arrange to keep sufficient stock of gravel, steel and hardware etc. The Deputy Director of Road & Civil Supply & Contract Affairs Dept. Tugger shall also ensure that prices of the essential commodities do not fluctuate.

#### **MAINTENANCE COMMUNICATIONS DUTIES ASSIGNED**

- In case of occurrence of disaster, the road communication of the district might be adversely affected resulting in disruption and delay in rescue and relief operations. To prevent such disruption and delay:
- The Department responsible for maintaining the roads are to be made vigilant and maintain the repairing of damaged of roads and bridges.
- The Executive Engineers of (i) PWD, State Road Division, Tugger; (ii) PWD, Territorial Road Division, Kanyaiba District, Sydney; Tugger; (iii) PWD, SR Division, Mysore; Bangalore and (iv) PWD, SR Division, Other are asked to ensure the standard of roads under the jurisdiction of their respective divisions.
- They shall identify vulnerable points of the roads and road bridges, and should keep men and materials ready for immediate repairing of damage, if occur.
- In the eventuality of the earthquake any road and bridge might be damaged. The Executive Engineer of (i) PWD, State Road Division, Tugger; (ii) PWD, Territorial Road Division

**Keypers District Power Supply (a) PWD, 325 Street, PagarKangra and (b) PWD, 507 Division, Jember.** shall have to be prepared for reporting of such damage in a short notice if any.

- The Executive Engineer, Jib provided, Suptgr and the Clerks-in-charge of the District, Suptgr and Town committees shall also remain prepared for reporting of the damage of the roads and bridges under their respective jurisdictions.
- In the event of occurrence of disaster, the telephone communication in the District might be disrupted.
- The District Manager of SPTCL, Tugur Circle shall keep men and materials ready for early restoration of mobile and land line telephone services of BSNL in the District immediately.
- The power utility phone service providers shall also remain ready for early restoration of their respective services in the District.
- In the event of disruption of the telephones, both land line and mobile, the VHF of the Police Station, Police Out posts, Army and CAPF Posts shall be utilized.
- To keep the VHF service in the event of termination of an earthquake disaster services of power should be kept ready in the Police Station, Police Out posts, Army and CAPF Posts.
- In the event of failure of all systems of communication, the services of the known messengers shall be utilized.
- The Circle Officer, Block Development Officers, Officers-in-Charge of the Police Station and Police Out Posts shall accordingly identify persons to be notified in such messages. In the event of need services of such messengers should be utilized.

#### **DUTIES ASSIGNED TO THE DISTRICT TRANSPORT OFFICER,**

- These would cover the total of good number of vehicles for electric road and motor operation in the face of occurrence of disaster.
- The District Transport Officer, Suptgr is assigned the responsibility of putting all types of vehicles required for rescue and relief operation.
- The District Transport Officer, Suptgr shall prepare a District Register of all types of vehicles in the District. The other information like the name of owner of the vehicles and their addresses with telephone nos shall also be incorporated in the Motor Register.

#### **ROLE OF APDCL:**

- Power supply is a prerequisite for uninterrupted providing of many essential services related to rescue and relief operation.
- The CEO, Tugur Electrical Circle, APDCL is entrusted the responsibility of arranging power supply in the District.
- The CEO, Tugur Electrical Circle, APDCL shall keep his men and materials ready for immediate repairing of any damage in the power supply system and installation in the District.
- Arrangement of alternative sources of energy should also be ready by making the power supply and installation of APDCL, APDCL in the District.

#### **ROLE OF DISTRICT ANIMAL HUSBANDRY & VETV OFFICER**

- The District Animal Husbandry & Vetv Officer, Suptgr is vested with the responsibility of arranging fodder for the domestic animals affected in the District.
- The District Animal Husbandry & Vetv Officer, Suptgr shall also be responsible for arranging treatment of domestic animals in the affected areas.
- The disposal of the dead animals carcasses shall also be the responsibility of the District Animal Husbandry & Vetv Officer, Suptgr.
- For this purpose, the funds and responsibilities shall be assigned to the Vetv Assistant Surgeons of the New Vetv Hospitals of the District and also to go with Army Vet Hospital, Muzaffar.

- The City: Assesses requests of the State City Hospital's water to meet with the concerned utility officials.

#### **ROLES ASSIGNED TO THE WATER RESOURCES DEPARTMENT:**

- The Executive Engineer, Water Resources Dept, Taper Division is entrusted to the responsibility of repair of water infrastructure of river basins to ensure:
- Any obstruction created in the natural course of any river in the district shall be removed to be restored by the The Executive Engineer, Water Resources Dept, Taper.
- The Executive Engineer, Water Resources Dept, Taper shall keep an up-to-date records ready for discharging such duties.

#### **Water Resources Department**

Sl. No.	Name	Designation	Contact No.
1	Dr. K. Kumar	EE, WRD	944927738

#### **FLOOD MITIGATION**

Flood mitigation refers to the various methods practiced and practicable, it reduces the actual or probable impact of floods on the people and their environment. The objective of flood mitigation is to control changes in the volume of water, peak crest of the flood, time of rise and duration of floodwater, and location of flooding. The mitigation measures should be directed to two major aims of these projects and they will substantially reduce the impact of flood on the district. The various measures adopted in flood mitigation may be categorized in two groups structural and non-structural.

#### **Structural**

- Construction of embankment flood walls along the river banks and improvement of the channel (by WRD).
- Construction of drainage canals in the Taper basin and other parts of the district (by WRD).
- Diversion of flood water (by WRD).
- Careful location of new facilities, particularly community facilities such as schools, hospitals and other important infrastructures away from flood prone areas.

#### **Non-structural**

- Collection of daily rainfall data (by WRD).
- Flood forecasting and warning (by WRD & District Administration).
- Prepare detailed floodplain map of the district, based on status of land subsided, and assessment of damage. Analyze how the pattern of flooding has changed over a period of time (by WRD & District Administration).
- Flammable in the vulnerable areas to check and control (by Forest Dept./Wild Conservation Dept).
- Preparation of DNDP and awareness programme.

#### **WINDMILL PROTECT**

Strong winds in districts refer to cyclonic winds during pre-monsoon season among villages and towns in the city and other properties. The main mitigation strategies for these hazards are a well-structured public and an effective warning system. The following mitigation measures can be adopted to reduce the impact of cyclonic winds.

- Planting wind breaks in the most vulnerable locations (by DFO).
- Construction of strong wind safe public buildings which can be used for community.

show to witnesses (by ICI & PBI (Sealing))

- Steps are to proceed by monitoring operations, prevent the utilization of these steps while on any other high work.
- Compilation of meteorological data for forecasting of cases (by Dept. concerned).
- Public dissemination of information through mass media, poster campaigns and village meetings (by Dist. Administration).

#### **FIRE ACCIDENT MITIGATION**

The following mitigation measures may be taken up to control the accident:

- Installation of fire extinguisher cylinders in all institutions (by concerned authority).
- Conversion of the system in the public areas (by PHEI/Police SA).
- Installation of fire warning systems in community buildings such as in school and hospital (by concerned authority). No installation of hand hoses in pub. buildings (by SA).
- Awareness about the cause of fire accident to rural areas and motivate the villagers to construct their houses of sufficient distance from one another (by SA).

#### **EPIDEMIOLOGY**

The Health Department and Veterinary Department are the central agency responsible for monitoring and control of epidemic. Mitigation measures for control of epidemic would include:

- Identification of areas prone to various epidemics must be reported to district headquarters (by DMO & DVO).
- Testing laboratories in district hospital must be well equipped and operated (by DMO).
- Regular flow of information both govt. establishment and PVOs via reports (by DMO & DVO).
- SOPs for any epidemic situation should be prepared.
- All urban structures should be well equipped to handle disaster situations.
- Awareness on including the data at regular intervals to assess epidemiological monitoring requirements (by DMO/DVO).
- Awareness campaigns to the PBU members and the villagers about various kinds of diseases and their causes that are prevalent in the area (by DMO/DVO/SA).

#### **ROAD ACCIDENTS**

Every five years last and condition are reported annually due to road accident, which is cause due to various driving and poor road conditions. The following measures may be adopted to mitigate road accident:

- Installation of speed monitoring machines in busy areas (by Transport Department police).
- Strict implementation of motor vehicle law (Transport Department, Police).
- Installation of traffic signs boards (by Police).
- Check of Road Act Book in every vehicle must be made mandatory (by Police/ITI) (transport).
- Insurance of all vehicles must be reported (by Police).
- Awareness about traffic rules should be reported to all drivers and commuters through MC (by police).

## CHAPTER VI

### ROLES & RESPONSIBILITIES OF LINE DEPARTMENTS :

#### HEALTH & FAMILY WELFARE DEPARTMENT:

The Health Service Quality is expected to be a lot of officials of the department working in different capacities/positions. There is a greater area to be dealt by it a position in different capacities/number of doctors, para-medical staff, dentists and other equipment in the case of the number of hospital beds is a good or not; other usual facilities i.e. radiology, physiotherapy, etc. It is also necessary that it should have sufficient facilities to meet the demand of the area. Following things should be defined and explained in detail:

#### Preventive Activities:

- † Active participation in the District Health level.
- † Report of the Dengue, TBC, GAC, Hepatitis and other infectious diseases in the area.
- † Report list of diseases and parasitological study of different category who can be withdrawn from their places of work and their services should be necessary related work.
- † Describe the subject work of morbidity, mortality and disability likely to be necessary and report the information to the local government.
- † Keep table records for supporting the hospital work by a team. If in case of emergency and opening one emergency department for each of the very vulnerable areas.
- † Arrange for collecting of other related para-medical related issues of the district (if) or to be made from the field work.
- † Report a detailed plan for collecting the disease and other infectious epidemics in the district if as required.
- † Take measures for prevention of epidemics and arrange vaccination against measles, cholera typhoid etc. in the people in these areas.
- † Identification of communicable or zoonotic and vector diseases.
- † Identification of appropriate facilities for vector elimination.
- † Liaise and co-ordinating with various health facilities.
- † Identification of disease surveillance, creating register regarding from the field level workers (NCH/TH/ etc) and its compilation and analysis in the TDC and District levels as a weekly basis daily basis in case of an epidemic or during unusual situations. Involving the staff of the Health Service level/Block District health facilities/Health Unit to the district and from the District to TDC.
- † Assessment of subject matter of health care with correct personnel, working facilities, communication system and emergency measures facilities.
- † Identification of treatment or preventive disease case for emergency epidemic control.
- † Assessment preventive plan, various infectious diseases and their prevention.
- † Training and IEC activities.
- † Training of field personnel, Traditional Health Attendants, community health volunteers, NCHs and GACs in first aid, measures to be taken in control outbreaks of epidemics during and after a disaster etc.
- † Assessment of health personnel in every hospital.
- † Listing of activities, report of epidemiological activities that will be implemented during epidemics for emergency response.
- † Vector Control programmes as a part of a rural community sanitation and etc.
- † Surveillance and opening of cases under the control of malaria.
- † Screening and strengthening District Health Centre with resources or preparations to respond for epidemic of an illness and control of epidemics.
- † Facilitating every attachment in appropriate facilities to collect the data under the early diagnosis and subsequent control.
- † Establishing preventive and methods of surveillance with the local authorities departments and GACs to ensure the epidemic prevention and preparation measures have been taken to prevent and/or minimize the possible outbreak of epidemics.
- † Identification of areas prone to common epidemics and assessment of requirements in control and ultimately eradicate the epidemics.
- † Identification of appropriate health services regarding the communicable and vector epidemics.

#### † Assessment of equipment in the present and for the future:

##### Equipment activities:

- † Meet with relevant officials and staff for equipment on subject of training
- † Check vehicle equipment in store and start equipment's programme of action
- † Immediately raise the different items along with our medical relief team
- † Determine whether limitations on equipment resources would affect the response
- † Make immediate arrangements to get additional equipment if necessary
- † Order the provision of 2nd Class and other VOs
- † Regularly visit the affected areas and assess effect on use of health resources
- † Discuss immediately on subjects of vehicle problems, if necessary, and arrange for solution
- † Supplying of emergency equipment with priority for local purchase among 12
- † Detailed assessment and reviewing the state of equipment resources in future (difficult part)
- † Make equipment available for treatment in disaster cases
- † Review and update procedures, resources & procedures and update the present one with the implementing team
- † Distribution of some health and training team members
- † Immediate report reference forms
- † Direct communication for information

##### Resource activities:

- † Collection of patient numbers and monitoring
- † Collection of treatment, monitoring and other systems central activities all the situation and through early assessment for system treatment
- † Vehicle monitoring
- † Treatment and care needed establishment of health or disaster groups
- † Information and resource mobilisation
- † Long term plan to progressively reduce resource numbers that result in high level of capability to increase of population affected by disaster
- † Resource equipment and stores
- † Repair or replace damaged equipment
- † Arrange the signal of medical facilities and facilities

## WATER RESOURCES DEPARTMENT

### Prevention Activities:

- Visit to generally flood affected areas and identify the different areas and location of the district on the basis of vulnerability.
- Assess properties level and assessment of damage levels for total picture of flood levels.
- Address flood-resistant buildings.
- Provide water level gauges at critical points along the river, dam and main.
- Be prepared and update the map if there is any change in characteristics of river course in the any project for generally flood affected areas and location of flood protection structures.
- Digging of side drains and other drains to prevent water seepage in lowlands (depressions).
- Construction of bunds or dykes to banks to protect agricultural lands against floods.
- Prepare detailed plans and estimates for works in per requirement.
- Issue necessary related notices to the District Administration in exercise of power.
- Prepare suitable list of flood zones if proposed for flood fighting, jetties or embankment, dykes and other flood protection structures.
- Arrange with the appropriate and other flood fighting articles and stores in suitable place.
- Arrange materials for creating temporary dykes in the work sites for the vehicles and keep all approved vehicles, tractors and machines in flood-free operation condition.
- Complete short-term emergency flood protection measures such as levelling, raising of benches, construction of temporary bunds, anti-seepage measures etc.
- Flood jetties of sand bags and other necessary items for beach closure at the Panchayat level.

### Response Activities:

- Start urgent jetties along embankment, dykes and other flood protection structures in case of the rise beyond the norms of the design level.
- Desilting of flood weirs.
- Issue urgent intimation of various messages to District Administration, Revenue Office (MOWA), Civil Office, EP officials & DCCA with details of flood & likely damage.
- Monitor physical condition of the embankment, dykes and other key works. See page are promptly attended to.
- Take protective measures without loss of time in case of any sign of breach.
- Digging of side drains and other drains to drain surrounding flood zone after flood water recedes.

## PUBLIC HEALTH ENGINEERING DEPARTMENT

The Executive Engineer (PH) will ensure the supply of drinking water and will also have the plan to undertake the repair of irrigation channels and flood protection activities during the occurrence of such incidents. He will also have to ensure the regular continuous distribution of all treatment water services in the district and should have sufficient stores required to maintain water the drinking water supply. Moreover, he should have the details of emergency and suitable available in the district in different locations that could be passed into the works within the district provide prompt.

### Prevention Activities:

- Checkup of dams and sewerage systems, particularly in the urban areas.
- Proper arrangement of water tanks and other means of distribution and storage of water.
- Adequate pipe arrangement to provide water and sewage services in identified sites to use in relief camps or in areas with high probability to be affected by natural calamities.
- Raising of elevated platforms, improvement in drainage structures and other infrastructures.

- measures to ensure best drainage during heavy rainfalls
- Visit to generally flood affected areas by 22<sup>nd</sup> April.
- Issue notices that it is required for site water supply at these areas.
- Prepare list of engineering personnel of different categories directly available and the number of additional hands that may be required in each case.
- Prepare list of engineering personnel of different categories who can be withdrawn from their places of work and their services utilized for emergency relief work.
- Arrange for mobilizing or erect across two PHE vans on the district HQ to visit sites for emergency relief work.
- Issue separate work of equipment and methods for seeking removal, repair, site maintenance etc. in the relief camps and other places in the affected areas.
- Keep materials and other stores for vehicles and keep them in appropriate places.
- Keep the equipment vehicles in good running condition.

#### Request Activities:

- Start arrangements either now and call for emergency in case of emergency.
- Check vehicles, equipment, stores etc. and draw up tentative programme of action.
- Visit the affected areas immediately along with water and site water supply engineers.
- Coordinate and continue monitoring of water tables.
- Ensuring provision of water to hospital and other vital installations.
- Carrying out emergency repairs of damaged water supply systems.
- Arrangement and distribution of emergency vehicles for equipment's required for dismantling and assembling materials, etc.

#### POLICE DEPARTMENT:

The Superintendent of Police should have the information with him relating to the emergency vehicles in each local, so that in case of need one or two persons who are on duty can be called and put on duty. The services are needed to maintain law and order & also required that he keeps watch on anti-social elements, ransack-scapes and those elements who react to take advantage of the situation.

#### Fire Services Activities:

- Keep the force in gear and the Rapid Action Force in particular fighting fire the search, rescue, evacuation and other emergency operations at all times through regular drills.
- Inspection and deployment of modern emergency equipment's while maintaining existing infrastructures and equipment's for disaster response along with regular training and drills for effective handling of these equipment's.
- Focus on better training and equipment's for Rapid Action Force for all types of situations, e.g. during equipment's.
- Monitor the members of Rapid Action Force that the force remains fighting fit.
- Ensure that all communication equipment's including vehicles are regularly functioning and deployment of extra vehicles suit to reasonable prompt.
- Keeping close contact with the District Administration & Project Officer (AO/DA).
- Involvement of the local army units in response planning activities and during the preparation of the annual contingency plans to ensure logistics and other support to relief forces during emergencies.

#### Request Activities:

- Traffic management and patrolling of all highways and other roads roads to facilitate work.
- Making sure that discipline is maintained.

- Success in forest administration for being necessary across aspect location, their activities and how forest occupying vital interest.
- Coordinate search, rescue and evacuation operations in coordination with the administration and Emergency relief management.
- Maintenance of law and order in the affected area.
- Security arrangements for vital activities in forest and its vicinity.
- Provision of security in forest camp having water's vital supplies camp occupying five years and sometimes water's.
- Help providing the belongings of a person.
- Till of the forest, the damage and the death cases.
- Keeping a collection of things, violation of private properties and destruction of animals and a game or wildlife.

#### **DISTRICT FOOD, CIVIL SUPPLIES AND CONSUMER AFFAIRS:**

In disaster situation the supply of essential commodities has to be assured. The Civil supplies corporation and food & civil supplies department should have information of the stock available in different godowns of the districts and it should also be assured by them that whenever required they should be in a position to provide essential food stuff and other essential commodities in a district area without delay.

**Prevention Activities:**

- Construction and maintenance of storage godowns at strategic locations.
- Stockpiling of food and essential commodities in anticipation of disaster.
- Take appropriate preservation methods to ensure that food and other vital stock are not damaged during storage, especially protection against rodents, insects and fungi infestation.

**Response Activities:**

- Management of procurement.
- Management of essential movement.
- Inventory management.

#### **FOREST DEPARTMENT:**

The District Forest Officer is required to have all the information with him in relation to warehouse, timber and fuel-wood in different locations of the district and will also coordinate with the forest department in the supply of timber and fuel-wood as required, in any of the places of occurrence of disaster in the district.

**Prevention Activities:**

- Detection of timber theft/plantation.
- Publicizing the public knowledge (such as forest cover, use of fuel under the forest department, the rate of depletion and its causes).
- Keep open (both private and animal) in working condition.
- Provision of seedling to the community and encouraging plantation activities, providing resources for providing seedlings in case of destruction of tree during natural disasters.

#### **AGRICULTURE DEPARTMENT:**

**Prevention Activities:**

- Collaborate scientific resources relating to the latest result of research available from IARI or any closely related research including State forest institute and other related

practice for agriculture in the affected area

- Develop IEC materials to stress the timing constraints on cropping patterns and preliminary measures to be undertaken during various seasons.
- Advise the dates after which sowing, transplanting should not be undertaken and advise on suitable cropping patterns.
- Stress the sowing (translocation of root systems to get tubers, brinjals, peas, and other crops).
- Prepare hand-outs regarding crop sowing over wide affected areas in the possibly flood affected area.
- Issue requirement of seeds, seedlings, manure etc. for paddy, rice and plans for emergency relief work.
- Make arrangements for sowing seedlings in specific government agricultural farms, wherever it.
- Advise on possible sowing various plant diseases, diseases cropping pattern in flood-prone areas. Dry broadcast, provision of seeds facilities, group sowing of seeds, etc.
- Develop disease diagnosis, spraying, irrigation water, insecticide, seed, fertilizer, etc.
- Issue response manuals to be drawn up for sowing the farmers for different types of disasters, e.g. rain failure in July or September & development of a disaster response plan taking into account nearby rainfall patterns.
- Improving irrigation facilities, extended management, soil conservation and other soil, water and fertility management measures. Keeping in mind the local agro-climatic conditions and the presence of the area in specific basins.
- Provision of alternative crop options and cropping patterns keeping in mind the sustainability of water in specific basins.
- Encourage the paddy and crop diseases and encourage early sowing.
- Encourage practices of agro services rather than crops for various facilities, seed and agro input cost and crop insurance.
- Review and update preliminary manuals and procedures and especially manuals that elaborate work of seeds and other agro inputs are available in case plans to extend activities.
- Review the proper functioning of rain gauge stations, have checks for immediate requirement of broken / malfunctioning gauges/equipment's, work on a daily basis rainfall data, ensure the review that the average rainfall and match it with the rainfall level of various crops to assess early practices of drought.

#### Emergency Activities:

- Start all sub-office offices and staff in receipt of warning.
- Arrange distribution of agricultural inputs in coordination with the district administration.
- Prepare technical guidelines to be readily available for storage and protection of various crops and raising of such reserves of crops as may be suitable during the season or in the next crop season.
- Arrange for spraying of pesticides wherever necessary.
- Conductly visit the affected areas to assess effectiveness of agricultural relief and rehabilitation measures.
- Management of control activities following crop damage, post-harvest and crop losses to

#### Minimum Issues

- Collection, laboratory testing and analysis of samples to assess their nutrient and nutrient status.
- Re-evaluation of land and other agricultural inputs to ensure that they are readily available to replace losses caused by natural calamities.
- Rapid assessment of the extent of damage to soil, crop, plantation, irrigation systems, drainage, waterways, other infrastructures and crops including soil肥 requirements to crops, to plan or to compensate and repair the same by ensuring early supply of seeds and other agricultural inputs necessary for re-starting agricultural activities when crops have been damaged.
- Establishment of public information centre's with appropriate and modern means of communication, to make known to providing information regarding insurance, compensation, right of agricultural equipment's and marketing of agricultural activities at the district.

#### Devises Available:

- Arrangements for early payment of compensation and crop insurance fees.
- Facilities provision of seeds and other agricultural inputs.
- Provision of drainage and flood control and irrigation.
- Review with the community, the identified vulnerabilities and risks for crops, specific species, areas, which are vulnerable to repetitive floods, drought, other natural hazards, forest logging, increase in salinity, pest attacks etc and develop district's cropping plan to minimize impacts to various risks.
- Facilities monitoring of soil losses for farm improvement.
- Establishment of a large amount of soil and water testing laboratory.
- Establishment of joint soil science monitoring system.
- Training in disaster-cropping techniques, forest cropping and other agricultural practices for soil science crop losses being taken disaster.

#### SOCIAL WELFARE DEPARTMENT:

During any disaster situation, the weaker and the neglected i.e., children, old and infirm, handicapped and expectant-bearing women suffer most. The community has a special responsibility for protecting them. The Social Welfare Department is entrusted with the responsibility.

#### Prevention Actions:

- Make arrangements for mobile units of maternity and child welfare centres wherever necessary.
- Start up welfare programmes for the children below 4 years and expectant nursing mothers in disaster prone areas.
- Make arrangements for raising care in the relief centres of epidemic, infant and lactation.
- Assess requirement and arrange for milk powder, baby food etc.
- Make a list of facilities of voluntary social welfare organizations located in the district.
- Make list of personnel for rendering services in the relief centres.

#### Response Activities:

- Act personal in receipt of warning and kept constant track with the disaster developments.

- Ensure that systems, offices and facilities recommended in the relief programme continue to properly maintain them
- Shift the location of facilities where necessary
- Arrange for well provided, fully fooded and/or suitable programmes

#### TELECOMMUNICATIONS DEPARTMENT

The Telecoms Control Manager shall make utmost efforts to restore telecommunications services in the affected area immediately, so that there is no communication gap and he shall put all his available resources and machinery to use for restoration of communication services within 10 days.

#### TOWN & COUNTRY PLANNING DEPARTMENT

Town & Country Planning is expected to have the list of all its officials working at different levels in different parts of the country and Niger National Niger Bankers should be in a position to maintain all its computers along with manual or computer records time period. Apart from performance of its traditional functions, the Department could help the State administration during the period of crisis.

#### PWD (ROADS & BUILDINGS) DEPARTMENT

Restoration of communication is of utmost importance in such an emergency and Executive Engineer is required to be well equipped with necessary plans in the event of disaster taking place. He should have complete information with regard to computer, machinery and manual set all the jobs in the district or his region and priority shall be given to re-open the flood/drainage works and to provide the manpower in case of emergency. Govt. buildings/Communal works should be inspected and necessary repairs to be got started following existing means offered.

#### APSC:

APSC shall ensure to restore meteorological power supply to the affected area in case of disaster taking place and will have all the information available with him to the manpower and materials at his disposal in the district.

#### Prevention Activities:

- Identification of critical facilities required for emergency response.
- Ensure and enhance the minimum safety standards to be adopted for electrical installation and equipment's and rigorous testing of electrical installations.
- Develop and enforce regulations to carry safety of electrical installations and electrical installations.
- Train and issue a contingency plan to ensure early electrical supply to essential services during emergencies and restoration of electric supply at an early rate.
- Develop and enforce rules of practice for power line clearance to avoid electromagnetic field to involve field work.
- Strengthen high-voltage cable system to withstand high wind speed, flooding and earthquake, maintain electric installation, strengthen electric distribution system to ensure minimum damage during natural calamities.
- Conduct public safety awareness campaigns to prevent electric accidents during normal times and during and after natural disaster.

#### Response Activities:

- Disconnect electricity after receipt of warning.
- Assess state of electrical systems and avoid or reducing standby equipment.
- Stand-by arrangement to assure temporary electricity supply.
- Dependent and repair of high tension lines substations transformers poles etc.
- Ensure the public and other agencies are segregated from any hazards, which may arise as a result of damage to electricity distribution system.

#### **TRANSPORT (DISTRICT TRANSPORT OFFICER)**

The District Transport Officer is required to provide transportation facilities for the evacuation personnel and shall issue a contingent plan with regard to district maintaining the availability of buses, roads or along with location.

##### **Prevention Activities:**

- Listing of vehicles that can be used for emergency operations.
- Safety administration, substandard and compliance.
- Training could be given amongst other vehicles.
- Build awareness on road safety and traffic rules through awareness campaigns, use of efficient RTI campaigns and training to school children.
- Issue proper enforcement of safety regulations regarding activities.
- Regulate vehicle, roads, and other means of transport to help in the emergency operations.
- Participate in post impact assessment of emergency situation.
- Support in search, rescue and first aid.
- Follow to cooperate and management of relief personnel to arrive deployment from the spot.

##### **Response Activities:**

- Provision of personal support services e.g. counseling.
- Supporting the administration in development of storage and to clearing a way, role and in the coordination of management and distribution of relief and rehabilitation materials.
- Suggestive role in reconstruction and recovery activities.

#### **FIRE SERVICE:**

##### **Prevention Activities:**

- Development/enforcement of relevant legislation and regulations to enhance safety of the safety measures.
- Modernization of fire fighting equipments and strengthening infrastructure. Classification of public, industry, etc. which highly susceptible to fire accidents or areas, areas which might lead to fire, building collapse, etc. and educate people to adopt safety measures. Conduct training and drills to assess degree level of preparedness and responsiveness.
- Building resistance to use of timber for processes and structure system.
- Training the communities to handle fire emergencies more effectively.
- TIF network for fire services linked with various fire prone activities.
- Training of workers in employees in fire proof techniques.
- Making clearance of building plan by fire services authorities.

##### **Response Activities:**

- Reacts if persons trapped in burning, collapsed or damaged buildings, damaged vehicles, including motor vehicles, trains and aircraft, industrial, hotels and passenger vessels, residential and schools.
- Control of fire and increasing storage fire in employees.
- Control of other dangers or hazardous situations such as oil, gas and hazardous materials spill.

- Protection of property and the environment from fire damage.
- Support to other agencies in the response to emergencies.
- Investigation into the causes of fire and water damage incidents.

#### **CITY, DISTRICT, SUBURBAN AND RURAL**

##### **Prevention Activities:**

- Organise training programmes to fire-kill, search, rescue and evacuation.
- Develop and implementation of fire risk, search and rescue services plans for major public events in the town.
- Ensure fire and rescue through regular drills and exercises at all times.

##### **Response Activities:**

- Act as support agency for provision of fire-kill, search and rescue services to other emergency services agencies and the public.
- Act as support agency for assessment of relief.
- Triage of casualties and provision of first aid and treatment.
- Work in co-ordination with medical and police teams.
- Help the Police for traffic management and law and order.

#### **RURAL DEVELOPMENT**

##### **Prevention Activities:**

- Keep a list of work moving and clearing vehicles (equipment) (available with Fire Department, H&A, and private contractors, etc) and develop a plan to mobilise them at the earliest.
- Inspection and emergency repair of roads, bridges, public utility and buildings.

##### **Response Activities:**

- Clearing of roads and establish connectivity. Remove roads, bridges and other necessary road clearance equipment to open the roads to traffic at the earliest.
- Mobilisation of emergency equipment for clearing blocked roads.
- Facilitate movement of heavy vehicle carrying equipment and materials.
- Identification and mobilisation of alternative routes to strategic locations.
- Killing of snakes, disposal of dogs, and control of animal waste along the road.
- Arrangement of emergency relief for every section of the district level for activities like clearance (power cuts), debris clearance (flood lifts) and other work for repair and maintenance of all disaster response equipment.

##### **Recovery Activities:**

- Strengthening and reduction of vulnerability with an objective to eliminate the disaster, which caused the damage.
- Relief and reconstruction.
- Clearing of equipment and debris from.
- Training to staff.
- Development of disaster and contingency plans.

#### **Q&A/INFORMATION**

##### **Prevention Activities:**

- Develop participative strategies for risk reduction at community level
  - Training of local representatives on various aspects of disaster management
  - President, Elio Parodi is to be a member of District Hazard Control Committee
  - Public awareness on various aspects of disaster management
  - Organise work shops
  - Promote and support community-based disaster management plans
  - Support strengthening response mechanisms at the G.R. level (e.g. better communication, food storage, search & rescue equipment, etc.)
  - Create dialogue channels, especially through community participation involving all members before crises occur
  - Facilitate alternative means of communication for assessment of relief needs and prepared to respond even in areas likely to be affected
  - Assist all the government departments to plan and prioritise preventive and preparedness activities while ensuring active community participation
  - Efforts to be a part of the damage survey and relief distribution teams to ensure proper perception
  - Constructed a temporary relief shelter and temporary shelter
  - Encourage, training water and medical aid arrangements
  - EC activities to greater awareness regarding the role of trees and forests for protection during emergencies and also to increase environmental impact which results owing to deforestation like climate change, soil erosion, etc.
  - Increasing involvement of the community, NGOs and DPOs in planning, promotion and other disaster prevention, preparedness and reduction activities
  - Plan for reducing the incidence, and minimise the impact of forest fire
- Response Activities:**
- Assist affected districts
  - Provision of free medical equipment's
  - Provision of building materials such as timber etc. for construction of shelter.

#### **DISASTRO INFORMATION AND PUBLIC RELATIONS DEPARTMENT**

The DPRO will ensure that no press briefing other than DC and EP individually or jointly will be held. In such contingency DPRO will arrange meeting with Press Club or what is required by the administration. He shall to play a significant role as in the discharge of responsibilities and press meeting news.

#### **Prevention Activities:**

- Make an assessment of the publicity requirements of the disaster zones (depending on extent of vulnerability) in the district.
- Creation of public awareness regarding various types of disaster through media campaigns
- Dissemination of information to public and other concerned regarding A's and D's of various districts.
- Keep close tie to be with the district administration and all concerned heads of departments by giving stress on priority
- Ensure that facilities for press communication remain unaffected during disaster cases
- Utilise the Police radio channel for transmission of urgent and important press coverage where necessary
- Maintain close link up with the local press and all media heads etc. concerned in the district.

#### **Response Activities:**

- ◆ Alert the staff for flight in receipt of messages and maintain close contact with the district veterinarian.
- ◆ Check for personnel and equipment and arrange priority through available means regarding food, clothing and instructions for evacuation etc. if necessary.
- ◆ Immediately visit the district affected areas and as far as possible priority requirements.
- ◆ Deploy fully equipped priority units to the affected areas.
- ◆ Install PA systems in the evacuation relief centres as may be required by the district veterinarian.
- ◆ Issue press messages by all available means timely and regularly to the I.R. newspapers etc.
- ◆ Setting up of a control room to provide accurate information to public regarding impending emergencies.
- ◆ Arrange for photographic and aerial view coverage of disaster situation wherever necessary.

#### **A.R. & VETERINARY DEPARTMENT:**

##### **Prevention Activities:**

- ◆ Assess requirement of veterinary resources to be taken to affected areas and arrange for VAI, VTA and other staff, equipment, medicines, Vaccines, disinfectants etc., animals for spacing for all routes and camp deployment.
- ◆ Locate suitable high places for sheltering livestock.
- ◆ Mobilize two or more veterinary teams at the district HQ for emergency relief work.
- ◆ Keep a prescribed stock of essential equipment, medicines, vaccines, disinfectants in every hospital, dispensary, first aid centre in the affected areas.
- ◆ Arrange for fodder from (ruminant) fodder farms or from other sources.
- ◆ Arrange for preservation of ruminant carcasses in epidemic free storage animals.
- ◆ Alert the district veterinarian in arranging with local bodies for supplying animal feed at reasonable price if required.

- Prepare voluntary help during hospital, quarantine, food and water, if not earlier and while population covered by work of these institutions
- Arrange for short flexible training courses by voluntary medical corps and preparation of epidemic nursing students for staff.
- Arrange for sufficient I.C. materials for public measures.

#### Report Actions:

- Advise the epidemic Officer and fill in receipt of receipt.
- Check and arrange personal, tools, equipment, vehicles etc. and draw up business programme of anti-epidemic relief work.
- Visit the food official areas immediately with a voluntary relief team and other relief teams.
- Arrange with the help of district administration visiting of lowest to visit's high ground.
- Equip additional for all cases and cases, wherever it necessary.
- Constantly visit the food official areas and survey effectiveness of the measure taken.

#### EDUCATION DEPARTMENT

##### Preventive Activities:

- Delivering lectures on Disease among Teachers & Students through different activities in the schools/colleges.
- Encouraging regular participation of teacher on Disease Management Training.
- Encouraging preparation of School Disaster Management Plans in the district.
- Encouraging regular Mock Drill exercises in the Schools/Colleges. Encouraging Schools/Colleges to conduct safety drills during disaster.

## CHAPTER-VII CRISIS MANAGEMENT PLAN OF DEPTTS

### OBJECTIVE

This crisis management plan has been prepared with a prime objective to establish the framework for efficient and effective response to be performed by police in an emergency. The Plan is meant to ensure –

- Quick and effective performance of function.
- Easy initiation for co-ordination of response action.

Being a law enforcing organization/Police in the district, it is vital that police must remain on a state of preparedness to provide its general readiness to respond to a crisis situation.

**THE ACTION PLAN:** Detailed analysis of disaster hazard indicates that in case of earthquake and flood, in view of the limited resources in the district, the role of police mainly involves

- Evacuation of public from high lying areas on receipt of flood warning.
- Search, rescue and transportation of people and providing all other assistance to the affected and injured people in case of occurrence of an earthquake.
- Supplement various Home Guards and other security personnel and VCPs for search, rescue and evacuation operations.
- Security of the property of affected people and maintenance of law and order in the district especially in the affected areas.
- Traffic management in the roads leading to the affected areas and in the affected areas.
- Quick dissemination of information.
- To ensure advancement of essential commodity Act.
- Proper investigation of cases reported in connection with an emergency.
- Identification of all vulnerable points, places, building, tanks etc.

### TASK

- Identification of all the Police Personnel of the district through training/training.
- Organization of HCU, VCP and proper briefing to them.
- Search, rescue and evacuation of persons on receipt of warning for flood or occurrence of any disaster.
- First aid to the injured people in the occurrence of the medical team and immediate shifting of the injured persons to the nearest hospital by any means.
- Security in the property and maintenance of guard, law and order especially in the affected areas.
- Traffic management in the roads near leading to the affected areas.
- To ensure advancement of essential commodity act.
- Investigation of the affairs related to the emergency situations with proper documentation.
- In case of RED Alert, search disposal system should be kept in readiness and put into operation whenever needed.
- As the first responder police would reach to the site of the explosion immediately on getting the information and assess the situation and send information to the higher authority regarding casualties.
- During rescue operation, the injured persons to send to the hospital. The dead body are to be segregated and all kept under strict control.
- Call for reinforcement for man, materials required for rescue operation.
- Updating the list of missing, injured and dead persons.
- Take video-photograph of the destruction of human life and property caused by disaster.
- Deployment/Police personnel to be maintained till the emergency situation.
- The drive on latest notification should be maintained.

- The IPAs and Know-Your-Is would be utilized for logging a month or the printing phase.
- Data should limit to essential remaining of the commercial vehicles.
- A monthly security scheme would be drafted not just cover the clock pending in the time. Singapore and regular checking of team playing in the other would be carried.
- A joint control team of all the firms would be set up for better coordination among various security agencies.
- Forming of team where that had clear plan and special action plan of handling and team into areas and deployment of manpower and resources are being specially addressed.
- Chemical and Biological Weapons are viewed as as "The poor man's Atomic Bomb". Protective against some of the infections, caused by Chemical & Biological weapons can be achieved by strict communication and other related procedure.

#### RESOURCE AVAILABLE

The Budget limit has a total MYR 500 million per annum. Besides 1 Day of UNDP and ICP are in the budget for create emergency operation 10 Days, 1 Pk 2 and 2 team of 4PK and 10 PK of TPC, of ARCC are also approved in this domain for law and order duties.

#### OPERATION DESIGN

The search and rescue and of other actions team will function under the operation control of Dept. Of Police, Dept. Of Police and other senior officers of the district will deploy the Police personnel, ICP, TPC, and other resources for the operations and other functioning.

#### OPERATION COORDINATION

The Dept. Of Police and other senior officers of the district will monitor the ICP and other relative police personnel for effective coordination with the officers and staff of the other Dept., organizations, institutions, NGOs etc. in the area, during and after the emergency. ICP communication should be used for immediate dissemination of the information.

#### KEY CONTACT NUMBERS

The name, address and telephone numbers of personnel of the key contact of the Dept. Civils office, important persons of the village, households, leading citizens should be available with each PK, CP, Police Control Room of the district.

#### NOTE

For effective operation during an emergency, the distribution team divided into the following

- Team and centre
- Team 1 area                      - Comprising Team 1P
- Cluster Area                    - Comprising Cluster 1P, 2 area 1P and Singapore 1P
- District Area                    - Comprising District 1P, 2 area 1P and Thailand 1P

#### EMERGENCY SQUAD (S)

All UC, of PKs will form an emergency squad consisting at least 1000 officers at 10000 households for their respective PK to deal with any emergency situation immediately. The officers and police personnel detailed should remain in the PK compound so that they can move for emergency operations within a short notice. Briefing should be made in this regard about their role to be performed during an emergency by the UC and other senior officers respectively.

#### WIRELESS COMMUNICATION

The IP (S) : Inspector C, Security; Team will start and arrange sufficient communication operation with PKs and arrange of any information about any emergency. They will ensure proper dissemination of message and presence of operation in all the districts and the clock. The affected areas should be well looked with all the action during an emergency.

### **TRAFFIC MANAGEMENT:**

The Traffic Tagger Dispatched Firefighters will direct all the traffic personnel in their respective PS and arrange to engage them in receipt of any information about any emergency. They will identify all the roads to be used during an emergency with a view to maintain the traffic lanes and shall be engaged with arrangements plan to be stopped in case of any emergency.

### **ROLE OF RESERVE OFFICER:**

The Reserve Officer, Police Reserve, Tagger will keep at least 30 Police personnel in readiness to arrive within a short notice. He will coordinate the police personnel of the library through issuing leading in consultation with the senior police officers. He will also keep ready equipment in the fire jacks, cone stand, cones, barriers, gas party etc. for use at any moment. The RO will keep in contact with the Commissioner, Police Guard for additional requirement of PS and give information to the Dist. Commissioner, MG in consultation with senior Police Officer.

### **ROLE OF W/O:**

The W/O, Tagger will keep at least 30 (1) number of heavy and light motor vehicle in readiness to arrive within a short notice during an emergency. He will also keep in contact with the officers concerned Dept. for emergency requirement of vehicles. He will arrange leading to the drivers and other officers if need of be learnt from time to time regarding the time to be performed.

During an emergency, The concerned personnel, department is asked to remain open and the check to avoid shortage of P.S. during an emergency.

### **ROLE OF CO. VDOs:**

The CO. VDOs of the each Police Station will inform and alert all the VDP number the PS and arrange to engage the same receipt of information about any emergency. Each CO. VDO will form an Emergency Operation Cell in consultation with the respective OC of the PS involving the VDP President, Secretary and members of the VDP with a view the VDP personnel in emergency operation without any delay and in a proper way. The cell formed with the VDPs should be headed by the O.C. and CO. VDOs in every monthly meeting of VDPs signaling their role to be performed during an emergency. The cell should be headed by CO. VDO himself and it should be made responsible for organizing VDP and to engage them in emergency operation without any delay. The available phone numbers of the members of the cell should be available with CO. VDO and the O.C. concerned.

### **POLICE CONTROL ROOM:**

The Police Control Room with Phone No. 0711-000000 and Mobile No. 9896000000 and 9239610011. One S.O. will remain in-charge of the Police Control Room and will attend the officers and men already posted in Police Control Room about the check and level time from time to time. The Control Room will effectively collect, collect and disseminate information regarding to the emergency and other various. Topical information should be passed to VDP Control, ADGP (L&C), GADP (S&S), GADP (S&S), Tagger, D.C. Inspector, Tagger and to the subordinate and other senior Police Officers accordingly. The in-charge of the control room will remain in contact with the officers of the concerned Dept. And collect and disseminate the information received without any delay.

### **List of Telephone Nos. of Police Dept.**

1	Sh. Kama Palakrishna, PS, Superintendent of Police, Emergency, Tagger.	0711000000
---	--	------------

## TEAM OF THE STATION OFFICERS

All the station officers of Fire Stations in the district will arrange to visit and engage the fire fighting team on every of the above-mentioned days as mentioned. They will keep ready all the fire station to receive police a demonstration. The station officers act as critical eye-witness. They will also keep close contact with the station officers and DoC of the FI for the operational status at the time of emergency.

## APFC:

**Inspections** - Jones of Maintenance of System in Tropic Electrical Division, supply these components as per grouped

1. De-energization of electrical services and tests prior to restoration of service like Flood System etc.
2. Restoration of service

**Disaster and Its Challenge:** Power System is one of the most important infrastructures of the country, its growth and better is directly correlated with the economic growth of the country. Any disruption of Power System due to Crisis / Disaster causes hardship to the homes, shops, in every aspect of human life & thereby it is ultimately associated with the disaster.

**Objective:** To evolve more proactive, holistic and integrated approach of strengthening disaster preparedness, mitigation and emergency response in case of disaster along with.

**Structure of the Bureau & Department:** District Manager used to look after the District Tropic Electrical Division. APFC has four fire divisions responsible to power supply in Tropic Town and Solov's area, Solov's & Raigapan.

**Specific Disaster Mitigation:** In case of power outage during evening, power supply is de-energized to save the lost property. The damage assessment of damage is carried out followed by restoration of service after repairing.

**Human Involvement Disaster:** Assessment of damage is carried out followed by restoration of service after repairing.

**The Action Plan:** De-energization through TMT, Chandra & Anand through industrial SAFA & TMT, Raigap & Raigapan through Dept. of contracted vendor and disaster mitigation by increased SAFA & ICE.

**Available Resource:** Policy, guidelines & mechanism available at Control Room located at District, Tropic IIT as a employee are working with Tropic Electrical Sub Division.

Solov's District Solov's, APFC, APFC, Tropic 090319487

## AGRICULTURAL DEPARTMENT

### INTRODUCTION

An overview of food loss between a regular farmer, a technology plan with different strategies is to be adopted to meet up the challenge. Hence, a plan has been prepared to get probable points of assessment of food loss different phases in the disaster-reduced losses.

No. of phase	Probable period of Occurrence of Loss	Proposed Strategies to be adopted
Pre-Plant (Pre-Plant)	Mid-April to June	<ul style="list-style-type: none"><li>- Buffer planting of crops</li><li>- Irrigation &amp; weeding</li></ul>
During Plant (Pre-Plant)	July to Mid-August	<ul style="list-style-type: none"><li>- Issuing of Government Fertilizer</li><li>- Distribution of water seedlings available at farmer's level in every farmer (except field soil)</li><li>- Arrangement for natural feeding</li><li>- Distribution of Paddy and Paddy seedlings</li></ul>
Post-Plant (Pre-Plant)	Mid-August to September	<ul style="list-style-type: none"><li>- Distribution of paddy seeds and paddy seed (Pre-Plant)</li><li>- Distribution of Paddy seeds</li><li>- Fire protection measures</li></ul>

**Objective:** The main objective of Disaster Management Plan is to minimize loss of human lives, financial, social and community assets on the occurrence of disaster. The objective may possibly be expressed as:

- i. To provide an efficient system for cooperation and collaboration with other Departments, Local Authorities, Agencies, NGOs and other organizations at District, Block/Local.
  - ii. Ensure preparedness, response and relief at all levels.
- iii. Ensure prompt and effective response to deliver the services during disaster, thereby to minimize casualties and public panic/terror, destruction and rehabilitation of some region.

**Health and Vulnerability:** Generally, greatest health in the area include flood, drought, earthquakes etc. Incidence of food supplement in the past in the district. Generally, damage to water supply schemes and open sources is experienced. Stocks of reserves of water supply schemes and open sources is carried out and distribution of drinking water sources is carried accordingly in flood affected villages. Flood Dams/Works are installed in relief camps and in affected villages to provide safe drinking water. Temporary low cost latrines are constructed in affected villages.

**Main role of the Department:** PHE Department is mandated for safe and quality drinking water supply service to the communities. The Department is responsible for providing management and technical services while responding to natural calamities. In restoration of damaged water supply infrastructure and sustained improvement, including meeting up emergency drinking water needs in the affected people struck by natural disasters.

**Responsibilities, Duties/Functions, during disaster and post-disaster:** Public Health Engineering Department maintains monitoring emergency systems with respect to failure of safe water supply and emergency sanitation services including carrying out timely repairs of water supply schemes in the event of disaster. Proper inventory is done of materials, spare parts and skilled human resources, etc. as under:

- i. Proper inventory of materials, spare parts, stocking provide are kept for WSS and Septic tanks.
- ii. Trained and skilled team for repairing and distribution of WSS and septic tanks.
- iii. Proper action plan for repairing and re-lining of reticulate, locating of deep well pumps in strengthening of platform in flood etc.
- iv. Action plan for re-arranging of septa reticulate if and when necessary.
- v. Maintain proper inventory of Portable Water Quality Testing Kit including timely re-stocking of the kits for keeping them in proper running condition.
- vi. To provide fully report on implementation of activities, assessment of impact etc. and submit the same to District/Block Level Authority during disaster.

**WSS & WSD activity in safe water and sanitation:** WSD is a defined unit under PHE Department which plans, organizes and implements EC & WSD activities in safe water supply and sanitation including awareness generation among the communities. EC & WSD is a routine activity of WSD and cannot not be done throughout the year at Block/District and Block levels. In any natural disaster WSD used to carry out EC activities and awareness generation on safe water supply and sanitation. The programme usually implemented through distribution of leaflet, direct interaction with leadership group/affected people, Press alerts, publicity through electronic media and printing media etc. WSD always remain alert to provide emergency due to natural disaster whenever it occur.

**Water Quality Monitoring:** In any natural disaster safe drinking water supply and emergency sanitation are more important activities for conducting the repairs. Spread of communicable disease are common in post disaster period and water quality monitoring and sanitation play more crucial role for the prevention of spread of communicable disease and to avoid occurrence of epidemics. As such PHE Department use to work out cooperatively with quality monitoring

through its laboratory network and this appropriate network where necessary for ensuring safe water supply to the affected people. Field Testing Kits (FTKs) will also be used to prevent water quality monitoring and to ensure same.

**Field Response:** In water disaster management, early action is preferred by PHH Divisions and reported to the District Level & State Level Committees and Disaster Management Departments. Early action usually encompasses: professionally conducted hydro-meteorology of water profiles, facilities, opening, re-opening and use testing of spot Test Kits, construction of bridges, overpass, culverts etc. The same guidelines will be followed to bring emergency of disaster zone.

**Guidelines:** PHH Department initiates the essential and emergency utility services like water supply to the community and its infrastructure including disaster recovery, as provided to avoid any sort of emergency services in the field of water supply and emergency sanitation. Periodic operations of PHH Department to manage and control any natural disaster proved highly efficient and effective and based on such strong foothold it could be assumed that PHH Department would fulfill improved services in any kind of disaster scenario, though the case is involved.

### 1. Staff of the main Department/Offices:

- 1) Chief Engineer (PHH), Water, Assam, Headquarters, Guwahati-781001
- 2) Chief Engineer (PHH), Jaintias, Assam, Headquarters, Guwahati-781001
- 3) Director, WWS, PHH, Assam, Bokoili, Guwahati-781001

### 2. Technical Organizations/Institutes at State, District & Local Levels:

Chief Engineer (PHH), Water, Assam, Headquarters, Guwahati-781001  
Chief Engineer (PHH), Jaintias, Assam, Headquarters, Guwahati-781001  
PHH, Assam, Bokoili, Guwahati-781001  
Additional Chief Engineer (PHH), North Assam Zone, Tezpur, Assam  
Engineer (PHH), Tezpur Circle, Tezpur  
Executive Engineer (PHH), Tezpur Division No. 1, Tezpur  
Assistant Executive Engineer (PHH), Tezpur Sub-Division No. 1, Tezpur  
Assistant Executive Engineer (PHH), Tezpur Sub-Division No. 2, Tezpur

### 3. Disaster Management centers:

- 1) Tank # 1 on Drinking water can be supplied to the affected people with the help of the truck through PVC water tank.
- 2) Chemical Tablets: 1000 packets (used for disinfection of spot sources)
- 3) 1000 liter WLL to water during disaster
- 4) Treatment of Potable Water Supply Scheme # 20' can from which water can be supplied to the affected people. Most of the schemes are identical scheme. In case of the disaster 4-5 nos. Diesel driven pumping sets may be arranged for running the schemes during disaster.

Local Officer PHH De-1

In-charge In-charge, WWS,

11. The AFE must follow MSAs & AFEs to build trust of the donor's accountability.
12. COFOs (or an administrative) DIF had a provision of Disclosure of Donor Funds (DDF).
13. Supervisors during this visit is not doing their job as per standing or not not doing their job as per normal standing being not level of details.
14. Values tracking of food assets. The supervisors under their visits must prepare and submit the list of projects where conflict along with steps to their visits to get every region and coordinate the list of projects and list of projects where necessary their report form of donor (DDF) and other records regarding their COFO national project files. It must be submitted to Health Department for Health Division. Donor under the delivery projects at the level of food. List should be submitted to DDFN within one week from receipt of the action plan through WFPorg and copy forwarded to DDFN for necessary action.
15. The main visit reported to Director manager as per report form in the project file. Project will be available in visit notes, reports, copy of standing or per normal reports of food assets as the FCDs are not approved from the national level DIF department. List should be submitted to DDFN within one week from receipt of the action plan through WFPorg and copy forwarded to DDFN for necessary action.
16. Supervisors must keep the visit notes to visit with copy for DDFN.
17. The AFE must do the donor visit during the project as per the to report other the visit.
18. The supervisors must maintain a separate register for each visit every where number of beneficiaries during visits in the respective groups, name of conditions, age, sex, gender name, village under particular AFE area. AFE & AFE name, name supervisor's name, date reported amount and date reported.
19. The DDFN of the donors must maintain the data of regular basis as the no different get notified by suppliers and also a single visit to regularly checked during the project.
20. The visit notes & registers under DDFN the data is submitted under the respective groups every alternate day along with national DDFN.
21. Village level DDFN (Formular Number 71, 72, 73) should submit to manager level with DDFN during visits.
22. The COFO must visit the field every every alternate day to visit office to monitor the overall situation of field every one day updating it to DDFN.
23. For Amoyan District, Don. Hala Kakra is the main office of Target Lines & Outputs (TLO) Director, Don. Ramona Mawardi is the main office of Village (VCO) Project, Don. Mimi Chayongga is the main office of Sanggaji (SD) Project, Don. Ego Rini is the main office of Chikungu, Bontaka & Sanggaji (SD) Project, Don. Estina Chini is the main office of Uluwu (SD) Project during the period of absence. Their contact numbers are provided below.
24. For Baso and Sulaia, Don. Riphana Chini is the main office of Baso, Subananta, Buhul, Bughawa & Marawati (SD) Project during the level of absence. Don. Dismantia Hany is the main office of Chikungu & Buhul (SD) Project during any kind of absence. Their contact numbers are given below.

District manager of Naha (WFP) under Sanggaji District  
 (0914-000-840, 840, 840)

## EDUCATION/HIGHERMENT

### School Disaster Management :

Disaster management is how we deal with the safety of school children. Protection of school properties are. During a particular disaster. It is the project officer who prepares the materials required to the managers and learn from the effects of major disasters. The construction of human responsibility and ability to reduce the potential negative consequences of this results in disaster at school. It is aimed, we learn to protect our school children from disaster like earthquakes, food, water and fire etc.

There are four phases in emergency management in school - Mitigation, Preparedness, Response, and Recovery by involving our teachers and also involving local public (NGO's) etc.

being done.

The Education Department of Bombay District is advised from Karnataka (Nalke Block), the western part of the District in Hingoli in the West and from the four hills of Aramandi Pratih in Northwards to the shore of near Maharashtra in Southern part including Maharashtra. The District and City areas. There are 1111 centres of educational institutions under Education Department in Bombay District.

Emergency Schools are controlled by District Emergency Education Officer, Bombay under the administrative control of Govt. of Assam.

Role to be played by teacher's Non-teaching staff, of emergency schools:

**(1) During Pre-Disaster:-**

- (i) Collection of fire law book, fire drill book with address, first aid book and booklets.
- (ii) Collection of first-aid kit, school kit, in accordance with No. of rooms in the school, strong school bag etc.
- (iii) To identify hazardous vulnerable schools by an Expert Committee.
- (iv) To conduct awareness activity among students by District Management Team in each school.
- (v) Organization of exercises, drills in schools for various hazards - emergencies.
- (vi) Mapping a list of important facilities (Police, Fire Service, Medical) with their phone number required in emergencies at a suitable place in each school.
- (vii) Distribution of different calls in each school for various emergencies like - Medical Call, Fire call, Police call, Lockdown Call, Co-ordination Call etc.
- (viii) Conduct training by District Management Team for immediate response on occurrence of Earthquake, Fire, Flood etc.
- (ix) Removal of fire loading material by means from the vicinity of school building - premises.

**(2) During the Disaster:-**

- (i) Activation of Disaster response team for assessment of students and vulnerable school premises to safe place.
- (ii) Call for emergency services from Police, Medical, Fire services etc. departments.
- (iii) Teachers Non-teaching staff, as to be engaged in relief and rehabilitation work.
- (iv) Open all emergency exits of school.
- (v) Teachers will extend academic and moral support, Psychological support to the students who will stay at school camp / emergency shelter.

**(3) During Post Disaster:-**

- (i) Eyes visible school building around is completely upland area for relief camp / emergency shelter.
- (ii) Engagement of teaching Non-teaching staff of the school for relief work.
- (iii) Spraying of Disinfectants in the school building especially after flood.

**Preventive Activities:**

Ensuring awareness in District among Teachers & Students through different activities in the schools colleges.

Ensuring regular participation of teachers in District Management Training. Ensuring preparation of School Disaster Management Plans in the district.

Encouraging regular Mock Drill exercises in the Schools. Preparing Schools for monitoring water pipes during disaster.

**Conclusion:-**

Officers, Headmaster and other employees will be during their time in emergencies under the supervision of District Emergency Education Officer, Bombay. Support and help will be rendered from the Medical, Police, Fire, PWD Departments and voluntary organizations of the locality of disaster will be utilized as well when required to minimize the effect of disaster in schools.

## **REGULATORY DEPARTMENT:**

- An irrigation system can be made fully redundant by the effect of a disaster. In the case of flood the land cannot be fertilized normally, there may be heavy silting on the floors of the land, rock and sand drains. The deep-drawers into well irrigation systems are also fully damaged by flood because the drainage may get clogged by the suspended materials carried by the flood water. Thus the huge loss may occur due to a natural disaster. The loss may be restored after the disaster subsides.
- During drought, depletion of water table makes the shallow tube wells more economical resulting in variety of irrigation and drinking water. Irrigation department has to undertake extensive measures like deepening of wells and also pumping of water through portable pumps from the surface sources like pond, well etc. Damage of crops due to drought is a major problem which may result in revenue and losses.

**For Disaster (Drought, raining and agency) handling:** The department undertakes training activities and capacity building measures to the field level functionaries at various levels. The training programs are conducted and sponsored by the Govt. of India but it tries to carry out their routine activities under normal circumstances. A few training programs are identified under the program which work on a short to medium term basis and enhance capacity building. This activity defines the role of the field level functionaries in operation and maintenance of the assets. People participation are also sought by involving the NGOs in the training and awareness programs. Programs are also held at CP, State, district and village levels involving the department personnel and NGOs beneficiaries. Planning for the disaster preparedness and mitigation is made through district level in accordance with the district administration. The state of the irrigation infrastructures are reviewed by the Executive Engineer and his team of engineers at pre - disaster stage and all the possible repair and strengthening works are taken up. As the disaster occurs before, intervention, are planned to the Sub-Divisions and field level functionaries for using flood preparedness and regulation of gates in the case of flow irrigation systems and raising of flood pipe with the use of surface layer tube wells.

**During Disaster (Flood, relief, essential services and others):** The role and responsibilities of the departmental response team at district level are furnished below. Main role of the department at district level during any emergency situations (disaster) is to ensure

- Regulation of the gates so that the flood water does not cause destruction of the assets.
- Operation of the electrical installation.
- Hoisting of the portable pumps to a safe place.
- Help the district administration in relief and rehabilitation.
- Observe the flood and raise immediate measures for the safety of the lives and properties. The District Govt. has issued detailed operating procedure (SOP) in tackle the emergency situation for different levels. Roles and responsibilities at state, block/CP level of different department functionaries are furnished below.

**Post Disaster (Repair of departmental infrastructures, reconnection of departmental services and others):** The damage caused to the irrigation infrastructures are reported to the District Commissioner and DDMO and with the approval of it, the proposals are submitted to DDMO for funding. As the funds are sanctioned, necessary repair and maintenance work are taken up. The inter-annual plan of the Govt. of India conducts inspection and review of the damage caused due to disaster. Technical support for repair of the irrigation infrastructures are made by the department at the state level.

## **Disaster risk mitigation of the departmental responsibilities**

- (a) Pre-disaster - activities are taken for repair and maintenance of the electrical and mechanical installations. In the case of drought or drought like situations, a detailed contingency plan is

reviewed and in consultation with the field level horticulture of the agriculture department to make use of the available land pumps for exploiting the available surface and ground water sources. Necessary training in this regard are given to the field level officers and staff of the department. The Water Use Association are also taken into confidence in the planning process so that the plan works effectively in the case of drought. As the natural disaster is very less common in Karnataka, the effects of it may be minimized if some key values and sufficient resources are made available for public. Action in this regard are already being taken by the UDMA/DMA/DCOs etc.

- (c) **During the disaster:** District Social Officer/District District Head will maintain in contact with DDMA/field agencies for early warning of the disaster. On occurring the disaster state, District Social Officer will be informed through phone, e-mail and text text SMS alert. District level Social Officer will initiate action as per Action Plan and instructions of the District Administration.

On receipt of alert from central level and the concerned officials will activate the response team and mobilize resources immediately for relief and rehabilitation work. The activities at district level are summarized and reported to the State DCO. The objective of having trigger mechanism for central disaster is to have pre-emptive activation mechanism for spontaneous response to an incident the concerned, control and management of the situation. The district engineer will prepare a list of engineering personnel of different companies already available in the district and a number of supporting staff in the case of outbreak of any disaster. Such list may be forwarded to the departmental authority and DDMA. The list will form the incident response team (IRT) at the field level. On receipt of disaster warning from the DDMA/District Administration, the District Engineer will

- To Alert concerned officers and staff for floods.
- To Check vehicles, equipment, etc. etc.
- To Check up running program of action.
- To Keep close touch with the district administration.
- To Visit the affected areas immediately with the IRT.
- Requirement of additional staff/Personnel through I.T or Additional DM/Engineer.

The field level officials (AE/IT) will report to the social officers at block level (MT) who will report to the concerned SDO/Circle Office and District Head Office (DHH). The District Social Officer will report to the State Social Officer (SS) and the District Commissioner. During the disaster especially the field, the control goes to the local levels and kept open and constant vigil is maintained so that the first response has the best effect on the flow and progress. The field level horticulture may be deployed for the relief and rescue operations as and when the district administration requires their services.

- (d) **Post-disaster:** The critical areas of the irrigation projects vulnerable to the flood or other natural hazard are identified and long term permanent measures are taken up for its reinforcement and improvement. A survey plan is formulated for the repair of damaged infrastructure. The District Engineer will
- Prepare a detailed statement of the damage and submit the statement for approval of DDMA/DCO.
  - Give sanction by DDMA, repair and rehabilitate work re-energizing.
  - Arrange for resources program for activation of the benefits of the schemes from the normal infrastructure.

#### **Operation Coordination**

The irrigation department is mainly responsible for supply of water to the crop fields of the farmers during flood. It has not yet itself means of the year. Therefore, the department undertakes the responsibility of review and operation as well as maintenance of irrigation infrastructure in the rain. The Tangedi Division/Tripplidivi Tangedi is responsible for control of irrigation facilities in all the crop fields of Gollur, Sanganur, Chinnayal, Bannur, Kuppur, Bannur, in the flood fields of the district. The District engineer works in integrated approach with the agriculture department of the district in rapidly coordination with the local district

minimization in the mode of progressive delivery of services to the public.

To take the role of the strategic department in disaster management into account in keeping the disaster administration in the relief and rehabilitation of the flood affected. With the expansion of the activities, the department has been reinforced in role and created as pre-disaster preparation. The strategic department maintains different responses at local, district and state level for transmission of knowledge to field level functionaries about the role and duties during pre-disaster, post disaster and during the disaster.

The strategic assets are essential and in operation in all the three stages in such a manner that the effects of the disaster are minimized. The public or large amount of work is protected by arranging possible help and services. The department always keeps in mind that the flood-prone monthly passes from the canal at lower levels, thereby at the necessary instance an timely re-organizing. Very often, the field level functionaries are engaged in the disaster administration for the relief, relief and other essential services during all the phases of the disaster.

#### Key Contact Number

All department contact numbers are placed in the attached folder.

#### Quick Response Team (QRT)

At District level:

Sl No	Designation	QRT position
1	Assistant Engineer, Tanya District	Engineer In-charge/Officer
2	Assistant Engineer, Tanya District/Block	Assistant In-charge/Officer
3	Assistant Engineer, Tanya District/Block	Assistant In-charge/Officer
4	Asst. Executive Engineer (FF)	Officer In-charge/Officer
5	Asst. Executive Engineer (Tanya)	Officer In-charge/Officer
6	Asst. Executive Engineer (Ch. Kalyani)	Officer In-charge/Officer
7	Asst. Executive Engineer, Tanya (General)	Officer In-charge/Officer
8	Asst. Executive Engineer, Tanya (General)	Officer In-charge/Officer
9	All essential Officers	In-charge and Engineer

At Division Level:

Sl No	Designation	QRT Position
1	Asst. Executive Engineer	Executive In-charge/Officer
2	Division Office	Division Office
3	Assistant S.A., District, H.E. Unit	Technical and Engineer (Systems In-charge)
4	PLC, PLC, control, IQB	In-charge and Engineer (Systems In-charge)

#### Measures for Recovery & Rehabilitation

After every disaster occurrence of damage is made by the Technical Officer in consultation with the Asst. Executive Engineer at the Sub-Divisional level and later verified by the Executive Engineer and accordingly, measures to prevent and eliminate water logging level, and repairing of damaged or destroyed assets especially in flood the severely level.

### Agricultural Extension by Agriculture Department (DAE)

Pre-Season	During Season	Post-Season
<ol style="list-style-type: none"> <li>1) Take into account resources relating to the latest issue of materials available from AAE/ etc. to ensure relevant materials including food tables, manuals and other material prepared for agriculture in the affected area.</li> <li>2) Advise the date after which sowing, transplanting (if applicable) under rain and sowing on suitable cropping patterns.</li> <li>3) Assessment of the storage under crops and nature of cultivation to be effected in each of the area.</li> <li>4) Prepare book on agricultural crops showing when to be sown crops in the specific food affected area.</li> <li>5) Assess requirement of seeds, seedlings, manure etc. for grain, roots and plants for emergency relief work.</li> <li>6) Make arrangements for sowing seedlings in specific processes: agricultural field, nurseries etc.</li> <li>7) Other measures as per AAE/ 17/8</li> </ol>	<ol style="list-style-type: none"> <li>1) Alert all sub-division officers and staff as regards sowing.</li> <li>2) Check each of seeds, manure, implements etc. and make arrangements for sowing seedlings.</li> <li>3) Check sowing progresses for emergency relief work.</li> <li>4) Arrange distribution of agricultural inputs in accordance with the district administration.</li> <li>5) Facilitate technical guidance to the needy cultivators for storage and protection of sowing crops and timing of seed sowing of crops in order to enable during the season in the next crop season.</li> <li>6) Arrange for spraying of pesticides wherever necessary.</li> <li>7) Constantly visit the affected area to ensure effectiveness of agricultural relief and rehabilitation measures.</li> <li>8) Other measures as per AAE/ 17/8</li> </ol>	<ol style="list-style-type: none"> <li>1) Review the tools and plants.</li> <li>2) Report the damaged tools and plants.</li> <li>3) Dispose of unutilized seeds and manure etc. which must be kept for use beyond a particular crop season.</li> <li>4) Other measures as per AAE/ 17/8</li> </ol>

### Flooded Disasters by Publicity Department (PDD)

Pre-Season	During Season	Post-Season
<ol style="list-style-type: none"> <li>1) Carry publicity flood affected areas by 10<sup>th</sup> April.</li> <li>2) Make an assessment of the publicity requirements of the specific areas (according to areas of vulnerability) in the district.</li> <li>3) Make a list of requirement of staff for deployment of publicity work in the areas for publicity work.</li> <li>4) Keep the departmental vehicles in good running condition for</li> </ol>	<ol style="list-style-type: none"> <li>1) Alert the staff for flood in respect of timing and resources (in accordance with the district administration).</li> <li>2) Check for personnel and equipment and arrange publicity through a public mass regarding flood warning and protection for emergency etc. otherwise.</li> <li>3) Immediately visit the flood affected area and a serious publicity requirements.</li> </ol>	<ol style="list-style-type: none"> <li>1) Review equipment etc. and take necessary steps for repair or replacement of damaged tools and equipment.</li> <li>2) Arrange for publicity activities in accordance with concerned departments regarding matters of health, sanitation, relief, grant etc.</li> <li>3) Arrange for monitoring of loss for self supporting publicity units for the affected area.</li> <li>4) Arrange for publicity and</li> </ol>

<p>Following items:</p> <p>1) Keep close liaison with the district commissioner and all concerned heads of departments for giving utmost priority.</p> <p>2) Ensure that facilities for press communication are not withdrawn during disaster season.</p> <p>3) Utilize the Police radio teams for transmission of urgent and important press messages wherever necessary.</p> <p>4) Monitor close liaison with the local press and all media heads etc. reported to the district.</p> <p>5) Other measures as per AEM-1978.</p>	<p>4) Deploy fully equipped publicity vans to the affected area.</p> <p>5) Install PA system in the residential/aid centres as far as possible by the district administration.</p> <p>6) Issue press messages by all available means (radio and telephone) to the AEM, newspapers etc.</p> <p>7) Emphasize that first affected areas to receive effect of use of the publicity measures.</p> <p>8) Other measures as per AEM-1978.</p>	<p>6) Carry out coverage of flood situation wherever necessary.</p> <p>7) Other measures as per AEM-1978.</p>
--	--	---

### Emergency Measures by A.M. & Veterinary Department (D.V.D)

Pre-Disaster	During Disaster	Post-Disaster
<p>1) Utilize quarterly fund allotted under by SI.</p> <p>2) Assess requirement of veterinary resources to be taken to affected areas and arrange for VAM, VFA and other staff, equipment, medicines, Vaccines, disinfectants etc. materials for spacing and/or control services and carry out preventive.</p> <p>3) Use available high planes for delivering vaccines.</p> <p>4) Monitor over a wide veterinary bases at the district level for emergency relief work.</p> <p>5) Keep a practical stock of essential equipment, medicines, vaccines, disinfectants in every hospital, dispensary, first aid centre in the affected area.</p> <p>6) Arrange for fodder from treated fodder farms or from other sources.</p> <p>7) Arrange for prevention of ticks spread disease or epidemics from mosquito attacks.</p> <p>8) Assist the district administration in arranging with local markets for supplying animal feed at concessional prices if supply.</p> <p>9) Prepare reservoir map showing hospital, dispensaries, first aid centres, M. centres and cattle population covered by each of these institutions.</p> <p>10) Arrange for short duration training course in veterinary medical care and prevention of epidemics using vehicles for staff.</p> <p>11) Arrange for sufficient IC material for public systems.</p> <p>12) Other measures as per AEM-1978.</p>	<p>1) Alert the concerned Officers and field staff on receipt of warning.</p> <p>2) Check and arrange personal, work equipment, vehicles etc. and driving licenses/permissions of emergency relief work.</p> <p>3) Verify the first affected areas immediately with a veterinary relief van and other relief assistance.</p> <p>4) Arrange with the help of district administration existing arrangements to provide high ground.</p>	

### Coordinating Disaster by Social Welfare Department (DWS)

During any disaster situation, the resident and the regional int. militia, old and infra. buildings and engineering workers will meet. The community has a special responsibility for providing relief. The Social Welfare Department is concerned with the responsibility.

Pre-Disaster	During and Post-Disaster
<ul style="list-style-type: none"> <li>- Visit to generally flood affected areas by 10th April.</li> <li>1) Make arrangements for welfare units of voluntary and DWS welfare centers wherever necessary.</li> <li>2) Draw up detailed proposals for the relief camps 1 year and departmental working method in disaster zone visit.</li> <li>3) Make arrangements for taking care in the relief camps of epidemic, relief and sanitation.</li> <li>4) Make arrangements and arrange for milk powder, baby food etc.</li> <li>5) Make a list of facilities of voluntary social welfare organizations located in the district.</li> <li>6) Make list of personnel for working services in the relief camps.</li> <li>7) Other matters as per ADM-1976.</li> </ul>	<ul style="list-style-type: none"> <li>1) Make provision for foods on receipt of warning and kept constant stock with the district administration.</li> <li>2) Ensure that epidemic, relief and sanitation arrangements in the relief camps are properly taken care of.</li> <li>3) Visit the districts to handle disaster wherever necessary.</li> <li>4) Arrange for milk powder, baby food etc. as per welfare programmes. 5) Other matters as per ADM-1976.</li> </ul>

### FOURTH BOX / DISTRICTS PLANNING, INNOVATIVE THINKING & IMPLEMENTATION

1. All developmental plans approved by state district authorities are checked for disaster mitigation angle.
2. Continuous planning & execution of plans for providing materials available for non-voluntary construction.
3. Implementation of the overall area (year management) is continuously monitored & all activities checked.
4. Districts are having training along with exercises involving structures & community arrangements for long term vulnerability reduction.
4. Conducts Awareness campaigns & arrangements for Disaster Proof Making planning at community level including lifting from low lying areas to safe relief grounds (with some incentives / benefits).
4. District Management including fire and disaster & evacuation as a compulsory part of school, village, educational institutions (both within-out) communities starting from primary level.
5. Equipping with PWC/DRG hospitals to provide training in first-aid course (the part & making it compulsory for all states to learn first-aid. (First-aid first-aid compulsory for any entrance exam including entry into "I level village school" as part of test for district leaders for non-voluntary work etc).
3. The same village/colleges in each DR zone at block & level in district equipped to provide training in rescue & evacuation need for year.
